For better organization, this will be the only generic resources thread; all others must be topic-specific or they'll be deleted.

https://www.reddit.com/r/opencalibre/comments/votvuh/calishot_202207_find_ebooks_amongst_246_calibre/
<https://gitlab.com/toolbox-resources/toolbox>
trakt.tv – can integrate with various piracy add-ons for Stremio/Kodi, etc, to automatically keep track of what you've watched. Also provides recommendations, curated lists, etc.
real-debrid.com – they resell premium hosts and have a cache of most popular torrents that can be downloaded or streamed over https. This one isn't free though, couple bucks a month. Considering they need to pay for the premium accounts and the bandwidth to cache those torrents, something like this is never going to be free. Best used with Kodi/Stremio/etc.
Webtor.io
It'll torrent the files for you using their servers and let you stream the video through your browser or just download the files.
<https://leechall.com/>
For downloading files from file hosting sites (extramatrix etc.

My beloved anons use these apps and sites to make your life easier.

><https://skillshare.heckernochecking.repl.co/>

Just paste any skill share link, and download !

>Blackhole

Free music app with good ui

>Simple login

Highly recommended this

>1DM

This download manager can download any video from any streaming site.

>Seedr.cc

Torrent downloader.!

><https://tinywow.com/>

Everything in one place

><https://zeflix.zone/>

Best Netflix alternative

>Bitwarden

Manages your password, also has browser extension!

>Use this [trick to find any content](#)

"go to Google search for any new movie or series

"if you can't find it, then go to bottom you will see something called DMCA complaints,tap on DMCA complaints,there you can see all the sites which used to host the file, so mostly you can find that movie there.!

>Fooview app

Just use it anons!

Have to attend class anons..will post some other sites and apps later.

🚩 Anon 11/21/2022 (Mon) 05:32:55 (30 days ago) ID: c61883 No. 492 >>493 >>495

Deepfaking

1. Learn the basics of stable diffusion from r/stablediffusion or /g/ or yt (should just take a couple of days)
2. Find about 40 highres pics of the person you wanna deepfake
3. Train a model on her pics using dreambooth [https://www.youtube.com/watch?v=ravETUa84P8&t=7s] [Embed] (many more vids on this)
4. Now you can make simple body shots from text2image by just typing
5. For porn, find some pics where the the girls has similar hairstyle and body to your subject
6. Load the pics on img2img tab, use inpainting on the face
7. Generate square outputs for best results, also generate in the res of the original pic for best quality

a scraper that gets all the media files on inch.b. you can download the files by running wget on the json file obtained

you have to install scrapy for this to work and place the file inside the app

> scrapy newproject inch

> [place the file inside inch and save it as inch.py]

> run it this way: scrapy crawl inch
